

Luis Alonso Cubillo Sandoval

FULL STACK DEVELOPER · WEB & FRONTEND SPECIALIST

📞 +506 8585-2107 @luisalonso2005@gmail.com [gh github.com/Perky219](https://github.com/Perky219) [in linkedin.com/in/luis-cubs](https://www.linkedin.com/in/luis-cubs)
📍 San Carlos, Alajuela, Costa Rica

Passionate **Full Stack Developer** and Computer Engineering student at ITCR, with hands-on experience building production web applications for real clients and collaborative academic teams. I specialize in **React-based frontend development** and enjoy tackling complex UI challenges, clean code architecture, and delivering reliable, user-centered products. Currently seeking a **professional internship in web development** for the second semester of 2026 where I can contribute, grow, and apply Agile practices in a real team environment.

FREELANCE PROJECTS

TodoPBWeb - Tourism & Local Commerce Platform

Feb. 2026 – Present

Frontend Developer · [Municipalidad de San Isidro de Peñas Blancas](#)

- Develop a public web platform to promote local businesses and tourist attractions in the Peñas Blancas region, allowing residents to register their businesses for free.
- Build reusable UI components and dynamic listing pages, and integrate Supabase as the backend layer for authentication, database, and real-time data.
- Collaborate in a cross-functional team using Scrum methodology and Git-based version control on GitHub.

Stack: [React](#) · [Vite](#) · [JavaScript](#) · [TypeScript](#) · [TailwindCSS](#) · [Supabase](#) · [PostgreSQL](#)

La Rancha - Bilingual Restaurant Website

Mar. 2026 – Present

Frontend Developer · [Freelance](#)

- Develop a bilingual (Spanish/English) static website covering menu, location, and contact sections, implementing i18n support to serve local and international visitors.
- Deliver a clean, mobile-responsive interface aligned with the restaurant's brand identity.

Stack: [React](#) · [Vite](#) · [JavaScript](#) · [TailwindCSS](#)

Soluciones Eléctricas del Norte - Business Website

Feb. 2026 – Present

Frontend Developer · [Freelance](#)

- Design and implement multiple frontend sections for a static informational website for a local electrical services business.
- Build responsive layouts and interactive UI components ensuring cross-browser compatibility and mobile responsiveness.

Stack: [React](#) · [Vite](#) · [JavaScript](#) · [TailwindCSS](#)

AppRifas - Raffle Management Web App

Dec. 2025 – Mar. 2026

Frontend Developer · [Freelance](#) · [ASECCSS Partner Client](#)

- Build a complete raffle management platform allowing organizers to upload participant and prize lists via CSV, handle the full raffle workflow, and display winners in real time.
- Implement export functionality for results in both PDF and Excel formats for post-event reporting.
- Integrate Motion for smooth UI animations and transitions throughout the raffle flow.

Stack: [React](#) · [Vite](#) · [JavaScript](#) · [TailwindCSS](#) · [Motion](#) · [CSV parsing](#) · [PDF/Excel export](#)

ACADEMIC PROJECTS

BookMe - Appointment & Scheduling System

Mar. 2026 – Present

Frontend Developer · ITCR – Web Development Course · Team of 6

- Contribute to a full-featured scheduling platform, leading the development of the calendar and services management sections.
- Work in a structured Agile team using user-story branches, pull requests, Husky pre-commit hooks, and Commitlint for commit standards, reflecting a professional development workflow.
- Consume a RESTful backend documented with Swagger, handling API integration on the frontend side.

Stack: React · Vite · TypeScript · Chakra UI · REST API · Git · Scrum

MoneyTrack - Personal Finance Dashboard

May – Jun. 2025

Full Stack Developer · ITCR – Web Development Course (Individual)

- Design and build a full-stack personal finance app with login, user registration, manual and CSV data import, and a real-time dashboard with bar, pie, and line charts for income, expenses, savings, and investments.
- Implement a RESTful backend with FastAPI and SQLAlchemy, applying a clean entity-relationship database model and data validation with Pydantic.
- Develop all React components and integrate financial goal tracking with dynamic progress indicators per category.

Stack: React · Vite · JavaScript · TailwindCSS · FastAPI · Python · SQLAlchemy · SQLite · REST API

Kyoto Tourism Website

Apr. – May 2025

Frontend Developer · ITCR – Web Development Course (Individual)

- Build a multipage responsive tourism site covering attractions, gastronomy, culture, and transport, with interactive maps via OpenStreetMap and modal popups for galleries.
- Implement mobile-first design using Tailwind CSS utility classes, custom JavaScript interactions, and semantic HTML5 structure — no third-party templates used.

Stack: HTML5 · CSS3 · JavaScript · TailwindCSS (CDN) · OpenStreetMap

TECHNICAL SKILLS

LANGUAGES: JavaScript, TypeScript, Python, Java, C, C++, SQL

FRONTEND: React, Vite, TailwindCSS, Chakra UI, HTML5, CSS3

BACKEND & DATA: FastAPI, Node.js, Supabase, Firebase, MySQL, PostgreSQL, SQLite

TOOLS & METHODS: Git, GitHub, npm, Jira, Scrum, REST API, Swagger, Pydantic, SQLAlchemy

EDUCATION

Instituto Tecnológico de Costa Rica

B.Sc. Computer Engineering

2023 – Est. Early 2027

Final course semester in progress. Professional internship projected Jul-Dec 2026.

Relevant coursework: Software Design, Software Requirements, DB Management I & II, Data Structures, OOP, Algorithms Analysis, QA, Project Management, Compilers & Interpreters.

CERTIFICATIONS

Web Services Fundamentals: Build a Mini Social Network

ITCR × Myongji College – K-Lab CR · May – Jun. 2025 · 48 hrs
